Portfolio: d25v5xu84onas.cloudfront.net

PROFESSIONAL SUMMARY

Network Engineer supporting AT&T enterprise WAN operations through Wipro, transitioning into AWS Cloud Engineering and junior DevOps roles. Combines production incident troubleshooting with prior enterprise web development and hands-on AWS hybrid networking, Linux, Docker, and CI automation. Validated dual-tunnel IPsec connectivity, published a secure AWS-hosted portfolio, and built container delivery workflows.

TECHNICAL SKILLS

AWS and cloud networking: VPC, EC2, VGW/CGW, Site-to-Site VPN, route tables, Security Groups, CloudWatch metrics, S3, CloudFront, OAC, IAM; Terraform infrastructure as code.

Networking and Linux: TCP/IP, BGP troubleshooting, SD-WAN, DNS, WAN circuits, IPsec/IKEv2, NAT-T, static routing, VTIs, Ubuntu, UFW, Bash, log analysis.

Application delivery: Docker, Docker Compose, Git, GitHub Actions, Docker Hub, Nginx; Kubernetes manifests, probes, Services, Ingress, ConfigMaps and Secrets.

Development: JavaScript, React, Node.js, Express, REST APIs, MongoDB.

SELECTED CLOUD AND DEVOPS PROJECTS

AWS Hybrid Cloud Infrastructure - Site-to-Site IPsec VPN

Independent technical lab | October 2026

- Built an AWS hybrid networking lab with four VPC subnets across two Availability Zones and an Ubuntu strongSwan gateway; validated both IKEv2/IPsec tunnels and bidirectional private HTTP/ICMP.
- Resolved recurring packet-mark conflicts in the strongSwan forecast plugin; tested failover and recovery with a 27.81-second gap between successful HTTP probes.
- Recorded 347 HTTP observations, verified MTU and blocked SSH, then removed temporary VPN resources and lab access to control cost.

Secure AWS Portfolio Hosting

Live personal website | Terraform, S3, CloudFront, GitHub Actions, OIDC

- Adopted existing private S3/CloudFront hosting into Terraform; configured encrypted, versioned remote state with locking and verified a no-change infrastructure plan.
- Automated GitHub Actions deployments using OIDC and restricted IAM; published two immutable releases, verified all 12 public files per release, and tested rollback to the saved earlier version.

MERN DevOps Notes App

Independent project | github.com/DeanAsadi/mern-devops-notes-app

- Containerized React, Express and MongoDB with Docker Compose; verified GitHub Actions builds and Docker Hub image publishing.
- Authored Kubernetes Deployments, Services, Ingress, probes and resource settings for a documented manual deployment workflow.

DEAN ESEDDI

PROFESSIONAL EXPERIENCE

Wipro Technologies | Client AT&T | Plano TX

Network Engineer - Production Operations | May 2025 - Present

- Troubleshoot enterprise WAN connectivity across routers, circuits, SD-WAN paths, BGP adjacency, DNS/VPN, and Linux-based environments to isolate network faults.
- Analyze performance degradation using ICMP reachability, interface/SFP state, routing behavior, and logs to identify fault domains and support recovery.
- Coordinate service restoration with carriers, field technicians, local contacts, and engineering teams for fiber, demarcation, CPE, interface, and circuit failures.
- Manage high-priority incident triage and escalations in SLA-driven operations; maintain technical updates, escalation paths, and action tracking through restoration.

Independent Technical Training and Development | Dallas TX

Infrastructure, Security, Cloud, and Software Labs | April 2023 - May 2025

- Completed structured hands-on training in networking, Linux, AWS, security, containers, and software development; earned CCNA and CompTIA Linux+ credentials.

Infosys | Dallas TX

Technology Analyst - Web Developer | February 2020 - February 2023

- Developed and maintained enterprise web applications; investigated defects and implemented fixes to support reliable application functionality.
- Supported application releases through deployment validation and coordinated issue resolution across development and support teams.

Neiman Marcus | Irving TX

Software Engineer - Frontend and Full Stack | January 2019 - February 2020

- Developed React/JavaScript interfaces and integrated REST services using Node.js and Express; used Docker for local development and contributed to testing, debugging, and release support.

CERTIFICATIONS

Cisco CCNA | Earned 2024 | Valid through August 2027

CompTIA Linux+ | Earned 2024 | Valid through June 2027

Previously earned, not renewed: AWS Certified Solutions Architect - Associate (2022); CompTIA Security+ and CompTIA PenTest+ (2023).

EDUCATION

Bachelor of Science in Computer Engineering | University of Technology | Baghdad, Iraq | 2010
